BROADBAND

## ETHERNET Internet Connectivity with T1 Availability & Reliability

### Overview

Telnes can deliver you Ethernet Internet Access where other providers can't. You don't need to be in a "LIT" building or use lower quality copper loops that are limited by distance. Telnes installs DS1 loops and special equipment to deliver service to your location without distance or building restrictions. Ethernet services cost less per meg than bandwidth alternatives--while delivering greater speed and reliability.

- + **Anywhere Ethernet**
- + **Faster Speeds**
- + **Cost Savings per Megabyte**
- + **Run demanding applications**

Ethernet services cost less per meg than bandwidth alternatives--while delivering greater speed and reliability.

Service includes a managed router and our highest level of dedicated support. With Telnes, you never wait on hold and can always speak with a intelligent person able to assist you with your support needs.

### Ethernet Delivery

### Amplified Support *Say goodbye to hassles and waiting on hold!*

With Telnes, you receive a dedicated personal support team here to help 24/7. This includes a **direct point of contact for account management**, real engineers and direct numbers to real people--who can help whenever you need any assistance.

*#1 Rated Internet Provider 2008 & 2009*

**Link Watch** *We want to know if there is a problem before you do!*

- **Instant Problem Alerts**
- **Circuit Performance Monitoring**
- **24/7 Network Monitoring**
- **Bandwidth Usage**
